

***International
Womens Day 2023***

***Women In Construction
Week 2023***

***It can be very intimidating
when you are a female
first starting out in such a
male dominated industry.***

***My advice to the future
generation of women
joining the construction
industry is...***

***Don't ever give up!
If you have a goal...***

Decide. Commit. Succeed.

***Here's to strong women
May we know them!
May we be them!
May we raise them!***

I found coming in to a male dominated industry straight from University with no experience very challenging, but worth every minute invested.

***We need future females
to join the industry and
face the challenge to
shatter all the glass
ceilings which are
still very apparent.***

We need women at all levels including the top, to change the dynamic, reshape the conversation, to make sure women's voices are heard and needed, not overlooked and ignored.

***I've definitely noticed a
lack of female senior
managers across
the industry.***

***I'd like to be the change
some day.***

***The women I work with
and encounter in
the construction industry
are always lovely and
supporting. It's really
nice to feel their support,
especially when they've
been in the industry
for a while.***

***The success of every
woman should be the
inspiration to another***
